

PANERIS satellite workshop

## Frontiers of Light Microscopy

Vilnius University Life Sciences Center

28<sup>th</sup> November 2024

In collaboration with the Lithuanian Neuroscience Association, the PANERIS consortium invites you to the satellite event on the advances of light microscopy. The microscopy workshop will include the presentations of application specialists from the industry, revealing current developments in commercial systems, and talks by advanced light microscopy users from the international research community.

Please register here: <https://paneris.eu/events/frontiers-of-light-microscopy/>

PANERIS consortium includes the Life Sciences Center of Vilnius University (Lithuania), Maj Institute of Pharmacology Polish Academy of Sciences (Poland), University of Lisbon (Portugal), and Hospital Clinic Barcelona (Spain). The consortium aims to ensure access to a wider pool of European talent to neuroscience-related infrastructure and contribute to aligning their R&I strategies, policies, and funding programs at the institutional, regional, and national levels. Access to excellent neuroscience infrastructure and resources is maximized through capacity building, tackling key skills, and setting a common internationalization strategy among the participating entities.
